

WAVES

Water Application & Verification Enterprise System

(originally “Application Modernization”)

Arizona Department of Water Resources

Project # WC22002

Informational Update

November 20, 2024

ADWR Vision

Reliable water supplies to meet the needs of current and future Arizonans.

ADWR Mission

To safeguard the health, safety and economic welfare of the public by protecting, conserving and enhancing Arizona's water supplies in a bold, thoughtful and innovative manner.

Project Team Introduction

Roles Present at ITAC

- Matt Marshall - Assistant Director Chief Information Officer
- Scott Selin - Chief Financial Officer

Project Status

Description of Project

- The Application Modernization project is now WAVES - Water Application & Verification Enterprise System. WAVES replaces mission-critical applications, from 2 - 22 years old. Replaces many of the paper based applications processes. ADWR's end users will see a reduction in application processing time, while staff will be able to prioritize value- added activities like policy development, analysis, compliance, accuracy, and planning.

Why We Are Returning

- This is ADWR's first informational update, meeting the conditional approval of PIJ WC22002 Change Request CR 1111.

Updates

- Fixed Fee based contract is in place with Salesforce Professional. (Original contract was Time and Materials.)
- IV & V contract with Gartner is in place.
- Sprints 1,2 3, and 4 are complete.
- Project status is Green.

Functionality Project Timeline

Oct

Nov

Dec

Jan

Feb

Mar

Payment Processing, Address Verification (Sprint 1-3)

Aug 26 - Oct 18

Licensing Time Frame (Sprint 1-5)

Aug 26 - Nov 29

Notarization, Map/GIS (Sprint 1-7)

Aug 26, 2024 - Jan 17, 2025

Base Setup, Customer Portal (Sprint 1-7)

Aug 26, 2024 - Jan 17, 2025

Wells (Sprint 1-9)

Aug 26, 2024 - Feb 28, 2025

Data Cleanup|Data Mapping|Data Migration

Aug 26, 2024 - Feb 8, 2025

Document Management (Sprint 2-6)

Sep 9 - Dec 20

Application Management, Surface Water (Sprint 2-9)

Sep 9, 2024 - Feb 26, 2025

Time Tracking (Sprint 3-8)

Sep 30, 2024 - Feb 7, 2025

Document Management (Sprint 4-8)

Oct 21, 2024 - Feb 7, 2025

Field Services, Adjudications (Sprint 5-10)

Nov 11, 2024 - Mar 21, 2025

Project Health Card

Overall Project Health is Green

Schedule		<ul style="list-style-type: none"> • Project schedule is on track • Project team is ahead of schedule with Data Migration, Sprint Planning and User Story Refinement.
Milestones		<ul style="list-style-type: none"> • Sprints 1 and 2 complete • Sprints 3 and 4 complete • Data Mapping, Data Views and Data Cleansing complete for three of the four Business units
Budget		<ul style="list-style-type: none"> • JLBC favorable review 9/26/24 \$2.5 million
Risks		<ul style="list-style-type: none"> • Data Migration risk is decreasing, with 4 of 6 areas prepared for migration. The remaining areas are proceeding as scheduled. • Data Team is ahead of the project schedule
Issues		<ul style="list-style-type: none"> • None to report

Latest (10/24) IV&V Findings Report - ADWR Responses

*Gartner's findings for this quarter show major improvement. The overall project rating is **Medium - Low**. ADWR reduced risks from 65 to a handful. Each of the identified risks is being mitigated.*

Risk 1. Key ADWR Personnel missing during UAT Testing, Go-Live, and Hypercare: If key personnel are absent during deployment without a proper coverage plan, then there's a risk of implementation issues and mismanagement in resolving critical challenges.

ADWR Response:

To mitigate this risk, ADWR created a Product Owner's responsibilities matrix that outlines tasks and decision-making processes, ensuring that roles and responsibilities are clearly defined, and reducing ambiguity during the Product Owner's planned absence. The Product Owner is conducting knowledge transfer sessions, including comprehensive walkthroughs of tasks, project documentation, and critical decision points.

Risk 2. Deployment Testing Environment Availability: If ADWR lacks early access to a dedicated and actively refreshed testing environment, then there's a risk of incomplete validation of automation processes and scenarios, impacting the quality of the final product.

ADWR Response:

ADWR recognizes that early and continuous testing is essential for identifying issues quickly. To address this, we negotiated a live version of the Salesforce development environment, which will be updated at the end of each sprint.

Latest (10/24) IV&V Findings Report - ADWR Responses

Risk 3. Reporting Limitation: If the data structure has limitations, then there's a risk of inadequate reporting capabilities, impacting decision-making.

ADWR Response: ADWR recognized limits in Salesforce's native reporting capabilities early on. Our updated contract provides for integration work to move data into our internal data warehouse for comprehensive reporting capability.

Risk 4. Short UAT Testing Period: If the User Acceptance Testing (UAT) period is insufficient, then there's a risk of incomplete testing and unresolved issues, impacting the quality of the final product.

ADWR Response: UAT is set for 4 weeks, 1 week longer than initially proposed. A dedicated team is assigned to oversee the testing process and will work closely with Salesforce to ensure thorough testing and successful issue resolution.

Risk 5. De-duplicating Data Across Multiple Databases: If the merging of contact data across multiple databases is not effectively managed, then there's a risk of data inaccuracies and inconsistencies, impacting the quality and integrity of the final merged records during deployment.

ADWR Response: ADWR acknowledges the inherent risks involved in merging and deduplicating data across multiple databases. The Data Team Lead created a comprehensive process for data deduplication, which has been successfully implemented for the Groundwater Permitting and Wells data. This documented process helps ensure that data quality and consistency are maintained throughout the deduplication effort.

Latest (10/24) IV&V Findings Report - **Bright Spots**

- **Project is On Schedule:** From its onset on September 6, the WAVES project has remained on or ahead of its implementation schedule. Project activities such as user story grooming and data migration are also on time or ahead of plan.
- **Project Budget Remains Healthy:** Salesforce and ADWR continue to report project budget as green. While there have been smaller discrepancies on scope of build items, none have resulted in the need of an increase in funding.
- **Impactful Resourcing Changes:** ADWR & Salesforce both augmented their teams with additional resources that have helped to reduce the strain on the legacy team members. ADWR's introduction of a fully dedicated Business Analyst has been observed as being invaluable (across both organizations).
- **ADWR & Vendor Collaboration:** The relationship between the two organizations has created a culture of collaboration that wasn't observed in Gartner's initial assessment in April 2024.

Q & A Session
