

ISD Systems Integrator

State of Arizona – AHCCCS

Informational Update

May 22, 2025

Project # HC23028

ARIZONA
HEALTH CARE COST
CONTAINMENT SYSTEM

Agency Vision

Shaping tomorrow's managed care...from today's experience,
quality and innovation

Agency Mission

Reaching across Arizona to provide comprehensive, quality health care
to those in need.

Project Introduction

Overview of Original Project Investment Justification (PIJ):

Background

AHCCCS is looking to design, develop and implement the Medicaid Enterprise Systems (MES) - Systems Integration Platform. This platform will create a standardized and electronic document and data management solution across enterprise systems, to allow the business to efficiently and effectively make decisions. On **6/21/2023**, ADOA-ASET gave approval to procure the *Systems Integrator* solution.

Benefits of the Systems Integrator Solution:

- *Creates a standardized platform to allow for cost effective integration of current and future systems*
- *Centralizes the aggregation of the enterprise data and document sets to connect the MES by removing barriers and redundancies through a common systems integration platform*
- *Standardizes operational reporting, Center for Medicare and Medicaid Services (CMS) reporting, common data extracts, dashboards, and Transformed Medicaid Statistical Information System (T-MSIS)*

The original PIJ spanned **14 months** and had total costs of **\$34,305,100**.

Project Status

IV&V Requirement Update

- CMS no longer requires IV&V for projects and therefore are additional scrutiny in order to secure enhanced funding. AHCCCS budgeted based on enhanced funding, therefore are currently evaluating their options regarding IV&V to meet state requirements and not put funding for project development at risk.
- We are currently working with ADOA-ASET to ensure IV&V requirements are being met, and will keep the committee informed to the process.
