

1. AUTHORITY

The Government Information Technology Agency (GITA) shall develop, implement and maintain a coordinated statewide plan for information technology (IT) (A.R.S. § 41-3504(A (1))) including the adoption of statewide technical, coordination, and security standards (A.R.S. § 41-3504(A (1(a))))).

2. PURPOSE

This standard defines requirements for the protection of State IT assets from intentional misuse or destruction by State employees or contractors, who may represent a potential source of threat or terrorism for unauthorized access and misuse of the state's computer systems, infrastructure, and sensitive (confidential and personal) data/information.

3. SCOPE

This applies to all budget units. Budget unit is defined as a department, commission, board, institution or other agency of the state organization receiving, expending or disbursing state funds or incurring obligations of the state including the Arizona Board of Regents, the community college districts but excluding the universities under the jurisdiction of the Arizona Board of Regents the community college districts and the legislative or judicial branches. A.R.S. § 41-3501(2).

The Budget Unit Chief Executive Officer (CEO), working in conjunction with the Budget Unit Chief Information Officer (CIO), shall be responsible for ensuring the effective implementation of Statewide Information Technology Policies, Standards, and Procedures (PSPs) within each budget unit.

4. STANDARD

The following standards provide requirements that protect information technology assets belonging to the State of Arizona from misuse or destruction by State employees and contractors.

4.1. WRITTEN POLICIES AND PROCEDURES: Budget units shall establish and document personnel security policies as well as related procedures that show clear accountability for security administration. Policies and procedures shall be applied to every existing State employee and contractor, as well as to new State employees and contractors, in order to prevent potential unauthorized access to and misuse of sensitive and confidential information. Policies and procedures shall be made available to all State employees and contractors and should be signed to indicate acceptance and understanding.

- The specific procedure which directs the steps and the timing required to grant or withdraw physical and system access privileges to State

employees and contractors working for or on behalf of the budget unit shall be documented for the following events:

- New hire and/or new contractor staff/organization,
- Change of job duties within the agency,
- Transfer to another agency,
- Resignation,
- Termination, contract expiration, and
- Alleged inappropriate behavior (as defined by the budget unit).

4.2. DOCUMENTED ACCESS TO INFORMATION AND RESOURCES:

- System, application, and information access shall only be granted in accordance with a formal, written, and auditable procedure (including a formal, written request for access to specific systems or data). Granting of access should be accompanied by appropriate security training in accordance with Statewide Standard P800-S895, Security Training and Awareness.
- Statewide Standard P800-S810, Account Management, provides requirements for establishing and changing user accounts, classifications, and responsibilities.
- Users should be provided access to the minimum set of resources required for their role, to minimize the impact of any security violations and improve accountability. The principle of least privilege requires identifying what the user's job is, determining the minimum set of privileges required to perform that job, and restricting the user to those privileges and nothing more. Denying access to resources that are not necessary for the performance a user's duties prevents those denied privileges from being used to circumvent security policy and standards.
- Permissions, or rights, shall be granted in accordance with group or role membership(s) based on job functions and assignments.
- Access privileges shall be removed whenever an authorized user changes jobs or terminates employment.

4.2.1. Intellectual Property – access to intellectual property shall be granted only after fulfillment of requirements specified in Statewide Policy P252, Intellectual Property and Fair Use.

4.2.2. E-mail – e-mail access shall only be established in accordance with requirements provided in Statewide Policy P401, E-Mail Use.

4.2.3. Internet Access – Internet access shall only be established in accordance with requirements provided in Statewide Policy P501, Internet Use.

4.3. SEPARATION OF DUTIES: Where reasonably and economically feasible for a budget unit, the State employee or contractor in charge of security for a “like” group of IT devices or services should not be responsible for the security of other groups of IT devices or services. (For example, the individual establishing user accounts should not be the same individual that grants access to software applications and associated databases.)

4.4. EMPLOYMENT CONSIDERATIONS: IT personnel and/or contractors (new and existing) working in primary facilities housing critical information systems (i.e., IT operations, networks, server farms, back office accounting systems, etc.) and have access to sensitive information, shall be notified of the following security requirements for conditions of employment:

- Possible background checks on previous employment and professional/personal references;
- A “*Non-Disclosure Agreement for Access To Sensitive Information*” in the Statewide Standard S810 Account Management and any other applicable confidentiality and security agreements by the budget unit, shall be signed by all State employees and/or contractors, who require access to sensitive information, prior to being granting access to such information;
- Job descriptions and job objectives for employment shall specify security practices and responsibilities of the individual applicable to the budget unit;
- Budget units that perform fingerprint imaging shall adhere to current Arizona Department of Public Safety (DPS) standards for fingerprint imaging/identification.

Should any of the above security requirements as conditions of employment be contrary to the policies of the Human Resources Division of the budget unit, or with the Human Resources of ADOA, the Human Resources policy shall prevail.
