Has a Project Request been completed for this PIJ?

Υ

What is the operational issue or business need that the Agency is trying to solve? (i.e. ...current process is manual, which increases resource time/costs to the State/Agency, and leads to errors...)

ADEQ processes roughly 28,000 transactions annually via paper form for various permits, reports, and receives payments from roughly 16,000 facilities. This causes ADEQ and the regulated community to enter the data multiple times, increased amount of re-work, and manual reporting. All of this manual effort is error prone and time consuming. This results in permits taking too long to issue, an increased number of facilities out of compliance, and an inefficient process for our customers.

How will solving this issue or addressing this need benefit the State or the Agency?

Implementing the next phase of the myDEQ portal will continue to improve environmental compliance by the regulated community. The public will benefit from more convenient access to public records and environmental information. Automating additional business processes will lead to faster, higher quality inputs from the regulated community.

Describe the proposed solution to this business need:

Phase 4 of myDEQ program proposes to develop additional online services. This is a continuation of the development efforts after the completion of Phases 2 & 3. It will continue to leverage the architecture and foundation deployed during Phase 1.

To describe the solution further - myDEQ application is a 3 tier architectural solution.

To describe the solution further - myDEQ application is a 3 tier architectural solution. Presentation layer is developed using XML, CSS 3.0, Java script and Bootstrap frame work. Application/middle tier leverages WSO2 products such as Application Server, ESB, DSS and Identity server. Data layer is an Oracle 11g database known as the Arizona Unified Repository for Informational Tracking of the Environment (AZURITE). myDEQ application is currently hosted on ADEQ data center and we are working with ADOA to migrate the application to ASET platform on AWS by June 2017.

ADEQ will continue using independent third-party reviews and lessons learned during the life of

Has the existing technology environment, into which the proposed solution will be implemented, been documented?

Υ

Indicate where that documentation can be found, or provide the information under separate cover before the meeting, otherwise describe below:

Provided under a separate cover

Have the business requirements been gathered, along with any technology requirements that have been identified?

Y

Are you submitting this as a Pre-PIJ in order to issue a Request for Proposal (RFP) to evaluate options and select a solution that meets the project requirements?

N

Will you be completing an assessment/Pilot/RFP phase, i.e., an evaluation by a vendor, third party or your agency, of the current state, needs, and desired future state, in order to determine the cost, effort, approach (RFP or otherwise) and/or feasibility of a project before submitting the full PIJ?

Ν

Does the project fall into one of the following categories:

- hardware technology refresh/expansion, e.g., replacement/more laptops, radios, peripherals, etc.?

Ν

Is the proposed procurement the result of an RFP solicitation process?

Ν

development included in the PIJ financials?
Have you determined that this project is in compliance with all applicable statutes, regulations, policies, standards, and procedures, including those for network, security, platform, software/application, and/or data/information found at https://aset.az.gov/resources/psp?
Are there other high risk project issues that have not been identified as part of this PIJ?
Will the proposed solution be vendor-hosted?
Will the proposed solution be hosted on-premise in a state agency?
Will any PII, PHI, or other Protected Information as defined in the 8110 Statewide Data Classification Policy be transmitted, stored, or processed with this project?
What help could ASET offer to increase the probability of project success?
ASET can help migrate myDEQ application to AESP platform by June 30, 2017

Summary of PIJ Financials Total of Development Cost: \$ 3,200,00 Total of Operational Cost: \$ Total Costs: \$ 3,200,00

Official ADOA-ASET Use Only

Х	Has the value of the IT project to the public and the State been identified?
Х	Does the proposed solution address the stated problem or situation?
Χ	Has the budget unit demonstrated competency to carry out the project successfully?
Х	Have all applicable questions in the PIJ been addressed?
Х	Have the Areas of Impact associated with the project been identified?
Х	Is sufficient sponsorship and support by budget unit leadership evidenced in the meeting?
Х	Has the compatibility of the proposed solution with other budget unit solutions been addressed?
Х	Has a reasonable Project Plan been provided?
Χ	Has the compliance of the proposed solution with all applicable statewide standards been confirmed?
х	Have any potential risks or issues associated with the project or the proposed solution been identified and appropriately addressed to minimize unintended consequences?
Х	Have the cost estimates for the project been vetted for accuracy?
Χ	Have the PIJ Financials been completed?
х	Have any/all of the following startup costs to implement the project been included under Development in the financial tables, if applicable - tax; shipping; upfront maintenance and support; professional services (P&OS); ancillary software to run on equipment; ancillary hardware to install equipment, e.g., cables; other associated costs, e.g., training, travel, documentation, etc.?
x	Have any/all of the following ongoing/5-year support costs, once the project is implemented, been included under Operational in the financial tables, if applicable - ongoing vendor hosting costs, including any projected increase over time; annual maintenance and support not acquired upfront; extended costs after warranty expiration; P&OS commitments beyond implementation?
х	Have you confirmed that no Full Time Employee (FTE) related costs have been included in the project costs?
x	Have quotes been provided for all itemized costs in the PIJ, e.g., professional services, hardware, software, licensing, etc.?
X	Do the quotes match the itemized list and only reflect those items and costs (within 5%) associated with this project?
<	If not, describe below how the costs in the PIJ differ from the quotes, e.g., if quantities are different, costs are comprised of portions of multiple quotes provided, etc.:
