Has a Project Request been completed for this PIJ?

What is the operational issue or business need that the Agency is trying to solve? (i.e. ...current process is manual, which increases resource time/costs to the State/Agency, and leads to errors...)

The Arizona Department of Public Safety (AZDPS) is responsible for the effective operation of the central state repository in order to collect, store and disseminate complete and accurate Arizona Criminal History records and related criminal justice information as mandated by Arizona Revised Statute, A.R.S. 41-1750. Since the existing coding of the CJIS applications utilizes old programming languages and technologies, AZDPS is currently at risk for state-wide failure to the law enforcement and criminal justice agencies we support. In addition to the multiphased project to replace an old mainframe Message Switch (already approved and underway), the Arizona Department of Public Safety will need to move remaining Criminal Justice Applications (Hot Files, e.g., Wanted Persons & Stolen Vehicles, and Criminal History Files) from the existing mainframe to the new open system. Archaic applications, databases and languages will be transitioned to new, easily supported systems running on windows and AIX. This will allow for a more flexible environment for future support and future applications, and will allow for the hiring of developers with modern system skills.

How will solving this issue or addressing this need benefit the State or the Agency?

Moving the Hot File and Criminal History applications to an open system will allow AZDPS to utilize a COTS application and it's support staff to maintain the system; connecting other systems to this set of applications will utilize standard based interfaces and hiring on-site personnel will become easier due to the larger number of candidates with more modern programming skills. This project will also get DPS one step closer to be able to retire the existing mainframe--all CJIS components will have been migrated.

Ν

2

Describe the proposed solution to this business need:

The proposed solution, provided by the vendor, Computer Project of Illinois (CPI), will include software licensing, consulting, on-going maintenance and support. The purpose of this project is to move CJIS applications from the existing DPS mainframe to the new open system, in order to provide databases and applications for the Arizona Criminal Justice Information System (ACJIS) to all law enforcement and criminal justice agencies, in state and across the country.

Has the existing technology environment, into which the proposed solution will be implemented, been documented?

Indicate where that documentation can be found, or provide the information under separate cover before the meeting, otherwise describe below:

DPS has this on file and is managed and maintained by the DPS Information Technology Bureau.

Have the business requirements been gathered, along with any technology requirements that have been identified?

Please explain below why the requirements are not available:

A needs assessment must be conducted to develop a finalized scope of work for the project.

Are you submitting this as a Pre-PIJ in order to issue a Request for Proposal (RFP) to evaluate options and select a solution that meets the project requirements?

Is the final Statement of Work (SOW) for the RFP available for review?

Will you be completing an assessment/Pilot/RFP phase, i.e., an evaluation by a vendor, third party or your agency, of the current state, needs, and desired future state, in order to determine the cost, effort, approach (RFP or otherwise) and/or feasibility of a project before submitting the full PIJ?

Describe the reason for completing the assessment/Pilot/RFP and the expected deliverable(s) below:

Define the requirements, develop finalized scope of work, receive quotes, project time lines, etc.

Provide the estimated cost, if any, to conduct the assessment phase and/or Pilot and/or RFP/solicitation process:

\$44.000.00

Describe how the software was selected below: After sending out requests for information, researching and speaking with other states that have the Computer Projects of Illinois (CPI) Message Switch, DPS purchased the Open Fox Message switch and decided to use the same vendor to house and maintain the CJIS hot file and criminal history applications in order to have a cohesive system maintained by one vendor. In addition, CPI has similar systems in 30+ other states.

Does the project involve any technology that is new and/or unfamiliar to your agency, e.g., software tool never used before, virtualized server environment?

Does your agency have experience with the vendor (if known)?

Does the vendor (if known) have professional experience with similar projects?

Does the project involve any coordination across multiple vendors?

Does this project require multiple system interfaces, e.g., APIs, data exchange with other external application systems/agencies or other internal systems/divisions?

Have any compatibility issues been identified between the proposed solution and the existing environment, e.g., upgrade to server needed before new COTS solution can be installed?

Will a migration/conversion step be required, i.e., data extract, transformation and load?

Is this replacing an existing solution?

Indicate below when the solution being replaced was originally acquired?

The existing hot file and criminal history systems have been in place for 30+ years.

Describe the planned disposition of the existing technology below, e.g., surplused, retired, used as backup, used for another purpose:

We will retire the existing technology. Any virtual machines will be repurposed.

Describe how the agency determined the quantities reflected in the PIJ, e.g., number of hours of P&OS, disk capacity required, number of licenses, etc. for the proposed solution?

As part of the pre-PIJ for this project, AZDPS conducted extensive discovery with the vendor. P&OS hours were determined by the vendor using the scope of work. Disk capacity was based on the number of records/size of records, licenses were determined by number of users etc.,

Does the proposed solution and associated costs reflect any assumptions regarding projected growth, e.g., more users over time, increases in the amount of data to be stored over 5 years?

Does the proposed solution and associated costs include failover and disaster recovery contingencies?

Will the vendor need to configure the proposed solution for use by your agency?

Are the costs associated with that configuration included in the PIJ financials?

Will any application development or customization of the proposed solution be required for the agency to use the product in the current/planned technology environment, e.g., a COTS application that will require custom programming, an agency application that will be entirely custom developed?

Will the customizations inhibit the ability to implement regular product updates, or to move to future versions?

Describe who will be customizing the solution below:

The vendor will be doing customizations using their own methodology.

Do the resources that will be customizing the application have experience with the technology platform being used, e.g., .NET, Java, Drupal?

Please select the application development methodology that will be used:

Provide an estimate of the amount of customized development required, e.g., 25% for a COTS application, 100% for pure custom development, and describe how that estimate was determined below:

The estimated amount of customized development for hot files is 20%. The estimated amount of customized development for criminal history files is 20%. Most of the customization is based on the Arizona Specific Laws which cover the entry and use of hot files and criminal history information.

Have you determined that this project is in compliance with all applicable statutes, regulations, policies, standards, and procedures, including those for network, security, platform, software/application, and/or data/information found at

Are any/all Professional & Outside Services costs associated with the customized

https://aset.az.gov/resources/psp?

development included in the PIJ financials?

Are there other high risk project issues that have not been identified as part of this PIJ?

Please explain all unidentified high risk project issues below:

Our current system is maintained by employees utilizing 30+ year old technologies, transfer of knowledge is required throughout the project. AZDPS must find ways to retain these employees throughout the life the of project.

Will the proposed solution be vendor-hosted?

Please select from the following vendor-hosted options: Vendor Hosted

Has the agency been able to confirm the long-term viability of the vendor-hosted environment?

Has a Conceptual Design / Network Diagram been provided and reviewed by ASET-SPR?

Will the proposed solution be hosted on-premise in a state agency?

Where will the on-premise solution be located:

Agency's Data Center

Were vendor-hosted options available and reviewed?

Describe the rationale for selecting an on-premise option below:

The decision to making this an on-premis solution took into account the sensitivity of the CJIS data, the low latency requirements of law enforcement agencies state wide and the proximity of the AZDPS Message Switch.

Will any data be transmitted into or out of the agency's on-premise environment or the State Data Center?

# Areas of Impact

#### 1 Application Systems

- X Application Enhancements
- X Internal Use Web Application
- Mobile Application Development
- Arizona Enterprise Solution Platform (AESP) based Application
- X New Application Development
- az.gov Web Portal Application
- Other: (Please specify below)

#### 2 Database Systems

Х

- Data Warehouse/Mart
- X Database Consolidation/Migration/Extract Transform and Load Data
  - Database Products and Tools:
- Oracle MySQL DB2 X MS SQL Server Other: (Please specify below)

#### 3 Software

- X COTS Application Customization
- X COTS Application Acquisition
- X Mainframe Systems Software
- X Open Source
- X PC/LAN Systems Software
- Virtualization
  - Other: (Please specify below)

#### 4 Hardware

- LAN/WAN Infrastructure
- X Mainframe Infrastructure
- X Storage Area Network Devices
- Public Safety Radios, Systems
- PC Purchases, Peripherals
- Tape Libraries/Silos
- UPS Devices
- Other: (Please specify below)

### **5 Hosted Solution (Cloud Implementation)**

|  | State Data Center              |
|--|--------------------------------|
|  | Commercially Hosted:           |
|  | Amazon (AWS) GovCloud          |
|  | Century Link - I/O Data Center |
|  | AWS (non-government) cloud     |
|  | Microsoft Azure                |
|  | Vendor Hosted                  |
|  | Other: (Please explain below)  |
|  |                                |

#### 6 Security

|  |                                   |                         |               |

\* Required Attendee

## Official ADOA-ASET Use Only

| х | Has the value of the IT project to the public and the State been identified?  |
|---|---|
| х | Does the proposed solution address the stated problem or situation?   |
| х | Has the budget unit demonstrated competency to carry out the project successfully?  |
| х | Have all applicable questions in the PIJ been addressed?  |
| х | Have the Areas of Impact associated with the project been identified?   |
| х | Is sufficient sponsorship and support by budget unit leadership evidenced in the meeting?   |
| х | Has the compatibility of the proposed solution with other budget unit solutions been addressed?   |
| x | Has a reasonable Project Plan been provided?  |
| x | Has the compliance of the proposed solution with all applicable statewide standards been confirmed?   |
| x | Have any potential risks or issues associated with the project or the proposed solution been identified and appropriately addressed to minimize unintended consequences?  |
| х | Have the cost estimates for the project been vetted for accuracy?   |
| х | Have the PIJ Financials been completed?   |
| x | Have any/all of the following startup costs to implement the project been included under Development in the financial tables, if applicable - tax; shipping; upfront maintenance and support; professional services (P&OS); ancillary software to run on equipment; ancillary hardware to install equipment, e.g., cables; other associated costs, e.g., training, travel, documentation, etc.? |
| x | Have any/all of the following ongoing/5-year support costs, once the project is implemented, been included under<br>Operational in the financial tables, if applicable - ongoing vendor hosting costs, including any projected increase<br>over time; annual maintenance and support not acquired upfront; extended costs after warranty expiration; P&OS<br>commitments beyond implementation? |
| x | Have you confirmed that no Full Time Employee (FTE) related costs have been included in the project costs?  |
| x | Have quotes been provided for all itemized costs in the PIJ, e.g., professional services, hardware, software, licensing, etc.?  |
| x | Do the quotes match the itemized list and only reflect those items and costs (within 5%) associated with this project?  |
|   | If not, describe below how the costs in the PIJ differ from the quotes, e.g., if quantities are different, costs are comprised of portions of multiple quotes provided, etc.:   |
|   |   |

If any of the above are not complete, the PIJ cannot be approved at this time.....

#### Strategic Program Manager Analysis

Project Background:

The Arizona Department of Public Safety (DPS) will implement a new Criminal Justice Information System (CJIS) platform including Wanted Persons, Stolen Vehicles, and Criminal History applications. This will include the relocation of the previously mentioned applications' file databases from the existing DPS mainframe to a new open system developed and maintained by a single vendor.

#### Business Justification:

Existing CJIS application coding uses old programing languages and technologies which place the DPS CJIS platform at risk of statewide failure to supported law enforcement agencies. Old applications, databases, and languages will be upgraded to the new and more flexible COTS open systems platform environment. The new open system will run on well-known and understood OS platforms including Windows and AIX. AIX consists of various proprietary Unix operating systems developed by IBM. This project will move DPS one step closer to retiring the existing mainframe as all CJIS components will have been migrated to the new system.

#### Implementation Plan:

DPS will manage the overall project, oversee and manage the IV&V vendor relationship with PCG. DPS will also provide required network connectivity, computing infrastructure. DPS will also manage agency specific configuration tasks.

The vendor, Computer Projects of Illinois (CPI) will provide the solution software licensing, installation and configuration including training and consulting. CPI will also provide ongoing maintenance of the system and solution.

PCG will provide third-party Independent Verification and Validation (IV&V) services including initial project report analysis for ITAC as well as quarterly reporting throughout the project.

A detailed requirements document compiled by DPS and CPI was provided to ADOA-ASET with the PIJ submission and will be kept Confidential.

#### Vendor Selection:

Requests for information were sent out along with independent research conducted by DPS and discussions with other states which currently operate CPI solutions. DPS had previously purchased CPI's Open Fox Message Switch. By utilizing the same vendor to house the CJIS hot file and criminal history applications, DPS will have a cohesive system maintained by a single provider. CPI has similar systems implemented in 30+ other states.

#### Budget or Funding Considerations:

Funding will come from Automation Projects Fund as well as DPS general funds. Project funding has been allocated by the legislature over a three-year time period. Additional funding will be requested at a future date.

#### Disposition:

This project is Recommended to ITAC for review and Approval with Conditions via delegated authority.

Authorized Approver:

Jeffrey Crane

Recommended Date:

8/23/2017

### Condition (If Applicable)

Should the final costs exceed the estimated costs by 10% or more, or should there be significant changes to the proposed technology, scope of work or implementation schedule, the Agency must amend the PIJ to reflect the changes and submit it to ADOA-ASET for review and approval prior to further expenditure of funds.
