

Information Technology Authorization Committee

Project Review

July 27, 2016

Action Item

Agency: Arizona Corporation Commission (ACC)
Project Name: Corporations Software Replacement
Project Number: CC17001
ASET Engagement Manager: James Dean

The Arizona Corporation Commission approves and maintains all corporation and limited liability company records, and by statute, makes those records available to the public online. The current records management system, called STARPAS, was implemented in 1993. The technology is no longer supported, requires excessive resources to update changes in statutes, is not scalable, and can't accept the varied types of documents which customers are required to submit. The current manual workflow utilized for outstanding or pending records can lead to inaccuracies in determining application processing time.

Based upon a prior Request for Information (RFI), a Request for Proposal (RFP), and market research, the ACC was able to review and compare solutions against identified requirements. The proposed solution is a commercial off-the-shelf (COTS) application currently utilized by other states. The application will be hosted within the Commission's Microsoft Azure GovCloud, with configuration, maintenance, and support completed by the vendor.

Motion Options:

- ITAC Approval:**
- ITAC Conditional Approval:**
- ITAC Disapproval:**
